## Education

### Nanjing University (NJU)

2023/09 - 2026/06 (expected)

Master of Computer Science and Technology

Nanjing, China

- Member of Pascal Research Group. Major in PL, program analysis and EDA.

### Beihang University (BUAA)

2019/09 - 2023/06

Bachelor of Computer Science and Technology

Beijing, China

- GPA 3.84/4.00, National Scholarship 2022 (Top 0.2% national-wide), Outstanding Graduate of BUAA.
  - Won the First Price of NSCSCC Compilation System Design Competition 2021, ranking 2nd.
  - Teaching assistant for *Programming in Practice* (Fall 2020), *Object oriented Design and Construction* (Fall 2021, Spring 2022).
- 

## Research Experience

### A lightweight edge-side compiler for neural network operators 📄

2022/06 - 2023/06

Working independently

BUAA

- Project for my undergraduate thesis, including a independently implemented lightweight edge-side compiler for LLVM IR and trimming work on the LLVM codegen module.
  - Using shape information at the edge-side device to perform secondary optimization on offline compiled LLVM IR format neural network operators, to reduce the temporal and spatial overhead during operator runtime.
- 

## Projects

### Ayame 📄

Team, implemented register allocation and codegen related optimizations

- A SSA-based compiler for a subset of C to LLVM IR/ARMv7, with optimizations such as GVN, register allocation etc.
- Project for NSCSCC Compilation System Design Competition, outperforming `clang -O3` on 1/3 testcase.

### Hanggai 📄

Team, participated in iOS app and web backend development

- An app for the course *Introduction to Aeronautics and Astronautics* in BUAA, supporting the web and iOS.

### Open-source project contributions (no particular order)

📄 rust-lang/rust-analyzer 📄 yuin/goldmark 📄 doomemacs/doomemacs | **Docs** 📄 Agda-zh/PLFA-zh 📄 progit/progit2-zh

---

## Skills

- **Programming Languages:** C, C++, Java, Rust, Swift, Python, JavaScript, Ruby, Verilog(SV), Haskell.
  - **Compilers:** Proficient in prevalent compilation optimizations; knowledgeable about LLVM; experienced in writing parsers, interpreters, and codegen.
  - **IDE Development:** Knowledgeable about rust-analyzer; familiar with Language Server Protocol
  - **PLT:** Familiar with functional programming languages, type systems and formal verification.
  - **Web/Mobile development:** Full-stack; Familiar with Vue, Rails, Django, SwiftUI, Docker, PostgreSQL, Redis ...
  - **Developing Environment:** Proficient in Emacs, JetBrains IDEs and Xcode; usually works in macOS and Linux.
- 

## Misc

- **Languages:** Chinese (native), English (fluent)
