Education

Nanjing University

2023.09 - 2026.06 (expected)

Master's Degree in Computer Science and Technology

- Member of Pascal Research Group, focus on PL and program analysis.
- Teaching Assistant for *Principles and Techniques of Compilers* (Spring 2024)

Beihang University

2019.09 - 2023.06

Bachelor's Degree in Computer Science and Technology

- GPA: 3.84/4.00. Awarded the **National Scholarship** 2022 and named **Outstanding Graduate of BUAA**.
 - Won the **First Prize** in the NSCSCC Compilation System Design Competition 2021, ranking 2nd overall.
 - Teaching Assistant for *Programming in Practice* (Fall 2020), *Object-oriented Design and Construction* (Fall 2021, Spring 2022).
-

Projects

Vizsla, a modern Verilog/SV IDE for hardware development.

(In development)

- (*Lab Project*) **Primary Developer**, designed the architecture of the IDE and implemented semantic analysis on Verilog/SV.
- Enabling real-time low-latency parsing and semantic analysis through **incremental computation**.
- Based on language server protocol to provide features like code navigation, refactoring, code completion, etc..

LLVM-Lite, a lightweight edge-side LLVM IR compiler for neural network operators.

🌐 [roife/llvm-lite](#)

- (*Lab project*, funded by Huawei) **Independently Developed** for my undergraduate thesis.
- Utilizing shape information to perform secondary optimizations on offline-compiled LLVM IR format neural network operators, to reduce the temporal and spatial overhead during operator runtime.

Hanggai, an educational app for the course *Introduction to Aeronautics and Astronautics*.

🌐 [Caniformia](#)

- (*Collaborative Project*) **Collaborator**, participated in the development of iOS app using SwiftUI and web backend using RoR.

Open-source contributions

[rust-lang/rust-analyzer](#) (active), [rust-lang/rust-clippy](#), [moonbitlang/tree-sitter-moonbit](#), [yuin/goldmark](#), [doomemacs/doomemacs](#) and [more on GitHub](#)

Skills

- **Programming Languages**: Not limited to specific language. Especially proficient in C, C++, Java, Rust, Python, Verilog/SV. Comfortable with Ruby, Swift, JavaScript, OCaml, Coq, Haskell, etc.
 - **PL Theory**: Familiar with type systems, formal semantics and formal verification.
 - **Compiler**: Proficient in compilation optimizations and various program representations such as SSA, etc. Familiar with parsers and interpreters development; knowledgeable about LLVM.
 - **IDE**: Knowledgeable in IDE based on incremental computation, especially familiar with rust-analyzer; proficient in LSP.
 - **Program Analysis**: Familiar with static analysis algorithm such as pointer analysis, IDFS, etc; proficient in analysis on Java.
 - **Web & Mobile**: Full-stack. Skilled in Vue, RoR, Docker, PostgreSQL, Redis; familiar with SwiftUI.
 - **Tools**: Proficient in Emacs; comfortable working in macOS and Linux; skilled in leveraging AI.
-

Misc

- **Languages**: Chinese (native), English (fluent)
