EDUCATION

Beihang University (BUAA)   2019.09 – 2023.06
(Bachelor of *Computer Science and Technology*) GPA: 3.84/4.00

RESEARCH EXPERIENCE

A lightweight edge-side compiler for neural network operators (BUAA)   2022.06 – 2023.06
- Undergraduate thesis project, including independently implemented lightweight edge-side compiler and trimming work on the LLVM codegen module.
- Using shape information at the edge-side device to perform secondary optimization on offline compiled LLVM IR format neural network operators, to reduce the temporal and spatial overhead during operator runtime.

PROJECTS

Ayame (Java, ARMv7 | co-developer, implemented register allocation and codegen related optimizations)   ⚙
- A SSA-based compiler for a subset of C, can export LLVM IR/ARMv7 ASM.
- Implement optimizations such as GVN, graph coloring register allocation, etc.
- Ranking 2nd in the Huawei Bisheng Cup 2021, performance exceeds `clang -O3` on nearly 1/3 of testcases.

Racoon (Rust, LLVM IR)   ⚙
- A SysY to LLVM IR compiler implemented in Rust.
- The reference implementation in Rust for labs of BUAA SE Compiler Design course.

Hanggai (SwiftUI, Vue, Rails | co-developer, participated in iOS app and web backend development)   ⚙
- An app for the course *Introduction to Aeronautics and Astronautics* in BUAA, supporting the web and iOS.
- *Hanggai* can be downloaded from AppStore.

HONORS & AWARDS

National Scholarship (Top 1.5%)   2022.09
NSCSCC Compilation System Design Competition (Huawei Bisheng Cup) (the First Price, ranking 2nd)   2021.08

SKILLS

- **Programming Languages**: C, C++, Java, Rust, Swift, Python, JavaScript, Ruby, Verilog(SV), Haskell
- **Tech Stack**: Vue, Rails, Django, SwiftUI | Docker, PostgreSQL, Redis, CI, Git
- **Compilers**: Familiar with LLVM IR and LLVM; understand prevalent SSA-based optimization algorithms
- **PL Theory**: Familiar with functional programming languages; understand type theory;
- **Dev Tools**: macOS, Linux | Emacs, Xcode, JetBrains IDEs

OTHERS

- **Teacher assistants**:
  - **Programming in Practice** (BUAA)   2020.09 - 2021.02
    Design course assignments & tutor students
  - **Object oriented Design and Construction** (BUAA, S.T.A.R team)   2021.09 - 2022.06
    Maintain course systems & design labs and tests & tutor students
- **Blog**: `https://roife.github.io`
- **Languages**: Mandarin Chinese (native), English (CET-6)
